### SUMMARY

Detail-oriented Front-End Developer with 2+ years of experience in building responsive and scalable web applications. Skilled in HTML, CSS, JavaScript, React.js, and Tailwind CSS, with strong expertise in team collaboration, performance optimization, and enhancing user experiences.

### EXPERIENCE

#### Front-End Developer

SFIKE Solutions Private Limited

OCT 2022 - FEB 2025

A solutions company focusing on web applications

- Redesigned and maintained the company's official website using HTML, CSS, and JavaScript, which increased site traffic by 35% within six months.
- Built and optimized cross-device web applications, reducing bounce rates by 20% and improving mobile usability scores to 95% on Google Lighthouse
- Optimized website performance and improved load times by 30% by implementing best practices in coding and caching
- Worked closely with UI/UX designers and backend engineers to deliver scalable applications, cutting development time by 15% through streamlined collaboration

#### Front-End Intern

Cloudcredits Technologies

APR 2025 - JUN 2025

A technology company specializing in software development

- Developed a responsive iOS-style Calculator using HTML, CSS, and JavaScript with a clean UI
- Built a Typing Speed Tester App using React.js to track WPM, CPM, and typing accuracy in real-time
- Applied modern front-end practices with a focus on performance and UI consistency.
- Recognized as hardworking, eager to learn, and proactive by the company's founder

### PROJECTS

#### Car Selling Hub

A modern platform for buying and selling cars

- Built and deployed a modern car selling platform with seamless login/signup using Clerk and real-time chat via Sendbird
- Integrated Cloudinary for image uploads and Drizzle-kit for efficient data handling
- Implemented a responsive UI with Tailwind CSS, enabled real-time feedback using Toastify, and deployed the application on Vercel.

#### Google Auth Blogging Platform

A blog platform allowing users to create and manage posts

- Built and deployed a full-stack blogging app using NextAuth (Google login) and MongoDB, ensuring scalable storage, high performance, and secure authentication.
- Designed a responsive UI using Tailwind CSS and optimized performance with a 95+ Lighthouse score
- Hosted the project with Git and GitHub

More projects (Portfolio, E-Commerce, Typing Speed App, Weather App, etc.) available on GitHub: [github.com/HamaadAfraan](https://github.com/HamaadAfraan)
